ASBESTOS POLICY GUIDELINES FOR DEMOLITIONS

In an effort to assist the Puget Sound Clean Air Agency in the enforcement of local and federal requirements concerning abatement of asbestos, the City of Mercer Island requires proof of compliance with the regulations relating to abatement of asbestos prior to issuance of a demolition permit.

Federal requirements and local regulations (Regulation III, Article 4, Air Pollution Control Agency) require that an asbestos survey be conducted prior to beginning work on most renovations and on all demolition projects. This required survey must be posted at the work site. The Puget Sound Clean Air Agency also requires a Notice of Intent to Perform a Demolition be filed with the Clean Air Agency before any demolition project may be started. If any asbestos is identified in the work area, it must either be properly abated prior to any work in the area, or not disturbed by the renovation or demolition activities. All asbestos must be properly removed in compliance with the regulations prior to any full demolition of a structure.

Please contact the Puget Sound Clean Air Agency at:

PUGET SOUND CLEAN AIR AGENCY

110 Union Street, Suite 500

Seattle WA 98101-2038
