Appendix F - Proposed Shoreline Environment Designations

Shoreline Master Program - City of Mercer Island

1 All areas within shoreline jurisdiction that are not mapped and/or designated are automatically assigned the "Urban Conservancy" designation until the shoreline can be redesignated through a master program amendment. In the event of a mapping error, the City of Mercer Island shall rely upon common boundary descriptions and the criteria contained in RCW 90.58.030(2) and Chapter 173-22 WAC pertaining to determinations of shorelands, as amended, rather than the incorrect or outdated map.

2 Areas waterward of the Ordinary High Water Mark are designated "Aquatic."
