PLEASE NOTE:

Data sources for the following static public maps were extracted from more comprehensive City datasets and are continuing to be validated.

Maps do not include every dataset being used in this investigation, and were primarily made for Council’s visualization of the situation at the October 6 City Council meeting.

While it is tempting to develop hypotheses based on these visual depictions, it is important to remember these do not depict all the information being used in the City’s investigation.

Several of these maps reflect incomplete datasets, and many will be updated repeatedly over the coming days for internal investigative purposes.
